Skills

* Python
* Linux (Debian)
* Django
* PostgreSQL
* Docker
* nginx
* Kubernetes

Working Experience

GESIS – Leibniz Institute for the Social Sciences, Cologne, Germany

10.2017 - 12.2020

Lead Software Developer

GESIS Notebooks is a free and hosted service for running Jupyter Notebooks requiring no installation, which enable you to get started quickly with your research ideas, prototyping your data science projects, or learning to program languages such as R, Python or Julia .

Responsibilities:

- Planning of the complete software development process
- Setup and maintenance of servers and the kubernetes cluster
- Deployment and maintenance of a Persistent BinderHub, a public BinderHub (GitHub repo: gesiscss/orc)
- Automation of all aspects including image building, chart and configuration updates, and deployment
- Initial implementation of the GESIS Login system
- Cooperation with jupyter projects
- Jupytercon 2020 Talk: "A Persistent BinderHub: Democratizing Access to Computational Resources in the Social Sciences"
- Workshop: "Introduction to Python"
- Publication: "iLCM - A Virtual Research Infrastructure for Large-Scale Qualitative Data."

Reference: Dr. Arnim Bleier

python | JupyterHub | BinderHub | repo2docker | Docker | Kubernetes | Helm | GitLab CI/CD | Prometheus | Grafana | Elastic Stack

GESIS – Leibniz Institute for the Social Sciences, Cologne, Germany

07.2016 - 09.2017

Lead Software Developer

WikiWho is an algorithm to parse the complete set of all historical revisions of a revisioned Wiki document in order to find out who wrote and/or removed and/or reinserted which exact text at token (~word) level at what revision. This means that for every token, its individual add/removal/reintroduction history becomes available.

Responsibilities:

- Speed and accuracy improvement of the existing core WikiWho algorithm
- Realisation of the website, the REST API, and a web-based API interface
- Realisation of a listener for Wikipedia events, connected to a task queue
- Update and improvement of the WhoColor server and user tools
- Data analysis: authorship, persistence, conflict, editor interactions

- Generation of a data set for the entire English Wikipedia: "TokTrack: A Complete Token Provenance and Change Tracking Dataset for the English Wikipedia"

Reference: Dr. Fabian Flöck

MIR MEDIA, Cologne, Germany

07.2015 - 06.2016

Software Developer

Backend Development | python | Django

Induux GmbH, Stuttgart, Germany

11.2014 - 03.2015

Software Developer

Backend Development | python | Django

Elektrobit Automotive GmbH, Böblingen, Germany

11.2013 - 05.2014

Student Employee

python | Django | Selenium | REST API

Elektrobit Automotive GmbH, Böblingen, Germany

04.2013 - 09.2013

Intern

python | software versioning | Unit testing | GUI development | CAN Bus | CANoe

PTV AG, Stuttgart, Germany

11.2012 - 03.2013

Student Employee

C++ | Visualization | The Visualization ToolKit

Education

University of Stuttgart, Germany

10.2011 - 05.2014

M.Sc. in Information Technology

Master Thesis, Industrial Automation Systems Institute, 12.2013 - 05.2014

Realization of incremental learning for automated identification using the example of products recognition

- Incremental Learning, Machine Learning
- Classification, Support Vector Machines (SVM)
- Learn++.NC based on SVM
- Learn++ based on SVM
- Python, scikit-learn ML library
- Eclipse, LabVIEW

Istanbul Technical University, Turkey

09.2006 - 06.2011

B.Sc. in Electronics Engineering (graduation in honor list)

Bachelor Thesis, Embedded System Design Laboratory, 02.2011 - 05.2011

Design and implementation of a server on graphic processor for secure RFID systems

- Parallel programming
- CUDA, GPU programming
- RFID protocol servers

Activities

- 09.2007 - 06.2011 : Member of Istanbul Technical University Control and Automation Student Society
- 09.2008 - 06.2009 : Administrative Committee Member of the ITU Robotic Olympics
- 09.2008 - 01.2009 : Member of the ITU Mountaineering Club

ESIGELEC, Rouen, France

09.2009 - 02.2010
Exchange Semester

Adnan Menderes Anatolian High School, Istanbul, Turkey

09.2002 - 06.2006

Languages

* Turkish (native)
* English
* German (B2)

Interests

* Hiking
* Swimming
* Jogging
* Pilates
* Reading
* Meditation
